# Our Story

Solving challenges and accelerating change.

Since 2006 when we began our reputation has grown, and our network expanded. Today we have a diverse array of clients all around the world, and an enviable network of leaders who have delivered ground-breaking transformation and market success for their organisations. Our focus is on accelerating success for leaders and their organisation's growth potential.

In 2023, we rebranded from Investigo Executive to InX to mark a new chapter of growth as a market leading firm of executive search and interim management <u>specialists</u>.

### Who we are

### Approachable, honest, no-nonsense, and creative.

Our executive search and interim specialists search far and wide for truly exceptional leaders to transform your organisation.

We specialise in technology, digital and transformation; private equity; strategy and consulting; property and real estate; and manufacturing.

So, rest assured that whoever you work with at InX is an expert who is as deeply immersed in their market as they are invested in your organisation's success.

### Why work with InX?

Because every company's success is about being connected to the right people.

Our culture empowers us to be authentic, curious, and creative, which means we approach executive search and interim management a little differently.

At InX, we don't look for quick wins or follow set processes, but instead we take personal responsibility for your success and tailor our services to suit your individual needs with bespoke, adaptable, and scalable talent solutions.

With our creative approach, we connect you to extraordinary leaders from a diverse talent pool, who are experts in transforming and accelerating your organisation.

## The InX difference

Because we invest time in building long-lasting relationships, our talented leaders go on to connect us with many, many

By thinking about the motives, missions, values, and journeys

We are agile and adaptable and adjust to your needs, so we can find the best solution that's right for your organisation.

### We're all about relationships, not just the brief.

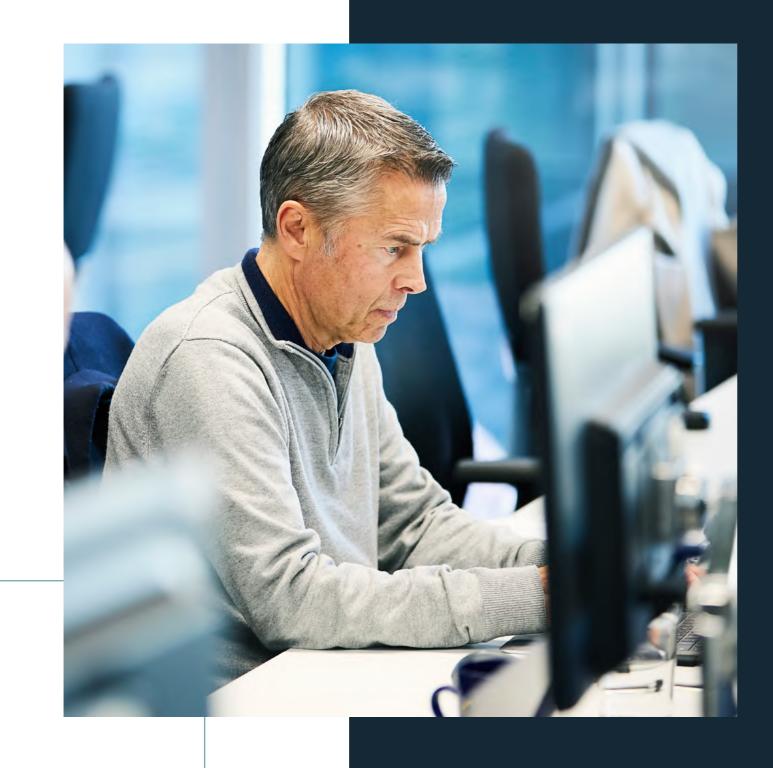

### Interim management

Accelerating leadership to accelerate growth.

Whatever your challenge or company size, the interim leaders in our network are some of the market's finest. Experts at navigating complexity, great interim leaders are both strategic and consultative, and take operational ownership for your transformation's success.

At InX, we look for interim leaders with proven experience in a similar role and demonstrable success in resolving challenging problems where others failed. This may include digital transformation, restructuring, developing new service lines, moving into a new market or territory, or completing a M&A.

## Executive search with InX

Designed to solve problems and accelerate positive change.

With everything you'd expect from a market leading partner, we bring insights and ask probing questions to help you create a welldesigned brief, and we offer useful market intelligence throughout each search.

As no roles are ever identical, we dedicate time to in-depth interviews and present a diverse shortlist filled with insightful advice that supports a smooth and considered interview process.

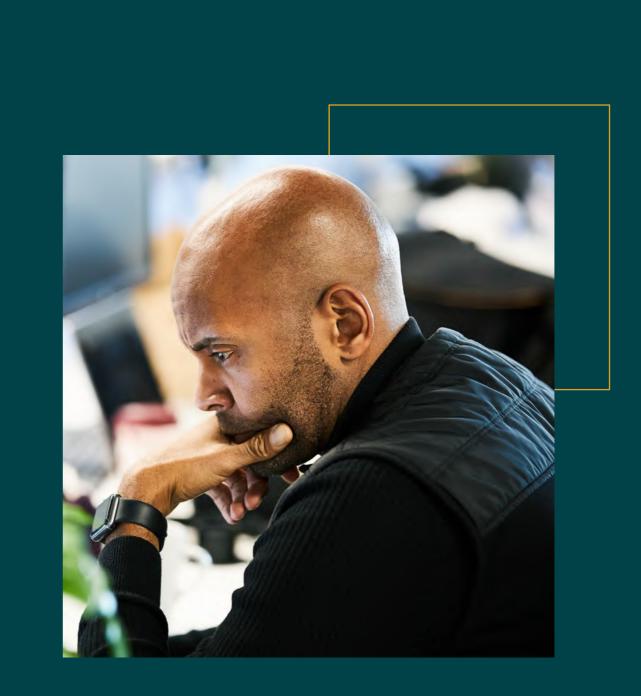

We support you through every part of the process from negotiation to onboarding so that everyone is set for success.

# Technology, digital, and transformation

Our technology search and interim experts understand today's leadership roles, and those that will shape tomorrow's both in Europe and the US.

With a diverse network of CTOs, CIOs, CDOs, innovation leaders, technology transformation specialists and CISOs, we can ensure you reach your business's transformation objectives whether through permanent or interim leaders.

Our specialists keep ahead of emerging trends and deliver insightful perspectives to help you to find the right leader in an ever-changing technology, digital and transformation landscape.

## Private equity

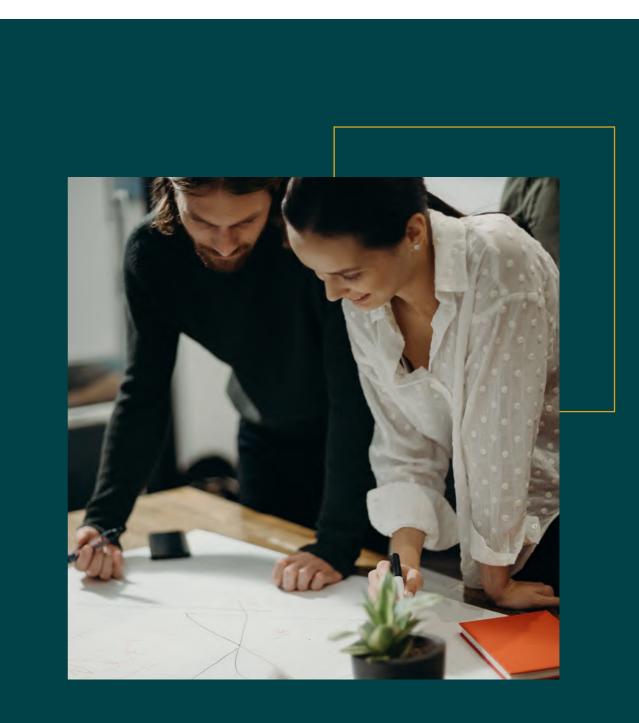

The InX Private Equity team works hand in hand with investment funds and their portfolio companies to accelerate growth and performance. We use our extensive network of sector and functional experts to secure talented, entrepreneurial, and forward-thinking leaders including CEO, COO, CFO, chair, NED and exec advisor appointments.

Coupled with our portfolio company expertise, our PE value creation team supports funds in the evolution of their own operating teams – lean groups of senior executives from industry and consulting that support management teams to grow and improve their businesses.

### Strategy and consulting

Our highly experienced strategy and consulting team has partnered with leading global consultancies and independent management consultants since 2009 in corporate strategy, operations, digital, and technology.

We've developed deep relationships and wide-ranging and exclusive networks of global managing partners, CEOs, transformation directors, and managing directors. Working across all functional strategies of the value chain, these strategy and consulting leaders balance analysis and technical skills with top-down transformational delivery.

## Property and real estate

Our specialist practice has a network of board advisors, independent ex-management consultants, facilities management programme directors, real estate experts and environment, sustainability, and governance specialists. Under their leadership, new builds, refurbishments, fitouts, and relocations are managed seamlessly, with cost savings maximised.

This might include designing a management consulting solution, setting up a service centre, recommending innovative technologies, or sourcing expert teams who hit the ground running. They'll help your organisation scale up or scale back, as you need, whether you're a global corporation, bank, or retail group.

### Manufacturing

As a search partner with years of experience, our manufacturing team has worked with leading organisations in the automotive, food and beverage, industrial and packaging markets across the US, Europe, and Asia.

We connect our clients to leaders in the manufacturing space who drive change across Corporate, Commercial, Operations & Engineering functions at leadership level to C-Suite. We value taking a collaborative and people-first approach to our search process and partnership with clients to ensure a tailored service that brings value to your business.

# Sharing insights and connecting people

We run various C-suite events to discuss what matters to leaders today. Recent events focused on how to reach net zero; what DEI means when it moves from boardroom agenda to everyday business; and building a NED portfolio career.

Speakers bring energy, insight, and real-world examples about the leadership challenges they've worked through, so that everyone leaves with fresh ideas, new perspectives, and meaningful connections.

If you'd like to attend our next event, please email hello@weareinx.com

## In need of acceleration? Get in touch

You might be an experienced leader who's looking for a new challenge or you might be searching for someone exceptional to meet that challenge and accelerate its success. Whichever it is, we believe you can never know too many good people – so do reach out to our team.

If we don't believe we're the right search partner for an assignment, then we say so because our focus is always on reaching a mutually successful end-goal. This means you have nothing to lose in having a conversation with us, and potentially much to gain.

Get in touch with Natalie Whittlesey, Director at InX on natalie@weareinx.com or view our team of specialists on www.weareinx.com to see how we can help.
